

5399 ACCESS CONTROL READER

5399 is a standalone access control system, stainless steel case for vandal proof, 500 users and 500 passwords, adopting 125 KHz proximity card and programmed on keypad with no software needed, so it doesn't provide audit trail record. It also possesses alarm functions, and includes 4 access methods: password, password + card, password +password, card + card.

Access control system accessories: electric locks (fail safe/fail secure) including proximity cards, electric bolt, electric magnetic lock, electric strike etc., power supply, exit button.

Access control system accessories: electric locks (fail safe/fail secure) including proximity cards, electric bolt, electric magnetic lock, electric strike etc., power supply, exit button.

SPECIFICATION

- Working voltage:12 V-DC
- Working current: 40mA, no accessory included;
- Peak current: 130mA, no accessory included
- Built-in buzzer and program LED
- Built-in proximity reader
- Keypad for inputting password
- Reading Range—65mm (depend on electrical environment and proximity to metal)
- Modulation—ASK at 125 KHz
- Compatible card – 125 KHz proximity EM cards
- Size: 116mm x 72mm x 25mm
- Weight: 260g ·Environment requirements:
 - a. working temperature: -31~63 °C
 - b. working humidity: 0~95 % (no condensation)
