

Enrich your style of presenting. The interactive pen display by Wacom. The compact and mobile HD solution.

The PL series has been designed for those, who want to combine the advantage of an pen tablet with a high-quality LCD display – to boost productivity and ergonomics at the workplace.

The PL-series interactive pen displays enable users to add handwritten input directly to the 15-22 inch monitors using a digital pen. They are therefore particularly suited for the presentation of full-page documents including the direct insertion of signatures. This provides solutions for applications where the contractual text needs to be depicted, for example when signing a telecoms contract or a contract at a banking counter. The PL-series of interactive pen displays are available in a range of sizes and can therefore be selected to suit any circumstance.

Looking for a flexible solution that lets you change environments easily with your mobile equipment? The PL-1600 is the perfect choice to enrich your style of advertising. It features a wide HD screen and a portable, compact 16" format. Simply connect memory keys or other peripherals to the USB ports wherever you are.

Because today's audiences are accustomed to a different, more interactive kind of media usage and consumption, Wacom has developed a contemporary, efficient presentation tool that helps to simplify any kind of knowledge transfer, whether in business or education:

- enriches presentation methods
- The PL-1600 allows comments to be written by pen directly on the screen which makes your presentation more lively.
- With its compact 16" widescreen HD display, it's the ideal mobile solution for users who change their teaching environments frequently.
- The PL-1600 promotes a motivating and fruitful face-to-face working atmosphere between presenter and listeners.
- Enjoy perfect hand-eye coordination and ergonomic posture.
